

NUVA COR

WE ARE PROUD TO HAVE PARTICIPATED IN THE CREATION OF
THE NEW CHILDREN'S LIBRARY AT
PLAINFIELD PUBLIC LIBRARY, PLAINFIELD, NJ

Joseph Da Rold - Director
Peter Rajcevic – C.T.O. /Facility Manager

The logo for Plainfield Public Library is displayed within a white rectangular box. The word "plainfield" is in a blue, lowercase, sans-serif font. Below it, the word "library" is in a black, lowercase, sans-serif font. The word "PUBLIC" is in a smaller, black, uppercase, sans-serif font, positioned between "plainfield" and "library".

library

- 
- 
- Plainfield Public Library had decided on a Tropical Rainforest Theme for the renovation of their existing Children's Library
 - When we began our involvement in this project, we discussed the possibility of using our High Definition Photographic Nuvacor product
 - The idea was embraced by the Library Director, Joseph Da Rold and his Chief Technology Officer, Peter Rajcevic
 - The areas of interest were 6 large 48" round Tables that would be used as reading tables for the Children. The end panels of the existing Book Shelves at one end of the room (6 in all), the cladding (in order to disguise) of an Air Conditioning chaser approx. 10 ft. tall and the creation of a Tropical Jungle water 'pond' underneath a Rope Bridge over which people entering the space would walk
 - We established a working methodology by which Mr. Da Rold and Mr. Rajcevic whose vision this was, could control the choice of imagery that was to be incorporated into the project. Along the way we offered advice as to usability of imagery chosen – image resolution, cost, etc.
 - The results are self evident

The 'Gutted' Library Space showing the future entrance and 'Water Feature' – Rope Bridge location

The 'Water Feature' & Bridge
early construction phase with blue protective film

Book Shelving End Panels being Prepped for Installation

The Completed Project

Entrance and 'Water Feature' – Rope Bridge location

We were asked to produce a Custom Color Nuvacor Edge Banding for use on the Table Edges which would Match the Children's Chairs
